

“Equal Education and Secure Living for All”

With the motto “Equal Education and Secure Living for All,” our activities focus on the following major goals:

- Promotion of social education
- Advancement of academics, culture, arts, and sports
- Human rights protection and peace
- International cooperation
- Healthy development of children
- Revitalization of economic activities

We are committed to putting our efforts into the following projects:

- ① Foreign language-related projects
- ② Human resource development projects
- ③ Projects to promote healthy development of children
- ④ Support projects for single parents
- ⑤ Multicultural coexistence support projects

① Foreign Language-Related Projects

We hope that all children living in Japan will have equal opportunities to learn English, regardless of their parents’ economic circumstances. Japan’s future economic development, international development, and mutual development are greatly dependent on communication in other languages.

Learning languages provides opportunities to gain knowledge of diverse values through interaction with people of various cultures, while also contributing to the development of children who can express themselves in their own words.

With education as our top priority, we will provide learning opportunities for all children by creating an environment where languages can be learned enjoyably and supporting them with all our efforts.

[Examples of Initiatives]

- Setting tuition fees at lower rates compared to private institutions
- Providing free or half-price language instruction to non-taxable households and other economically disadvantaged families

- Setting up courses according to individual abilities
- Support for obtaining qualifications (Eiken English proficiency test)

② Human Resource Development Projects

We provide support for motivated foreigners working in Japan toward employment.

Some foreigners want to work in Japan but cannot take the next step due to barriers such as language and lifestyle customs.

To give them a push forward, we will provide support starting with life assistance, including cultural understanding promotion, Japanese language support, and approaches to companies.

[Examples of Initiatives]

- Employment support (e.g., job searching)
- Holding Japanese language classes
- Holding English classes
- Life support (e.g., support for obtaining licenses and daily life assistance)
- Providing learning opportunities for Japanese lifestyle customs (e.g., acquiring manners)

③ Projects to Promote Healthy Development of Children

There are children who cannot find their place even in schools, which should be environments with many friends where they can learn enjoyably, or even in their homes, which should be the safest places, and who suffer from feelings of “confinement” and “loneliness.” This may be partly due to the weakening of warm human connections caused by rapid technological advancement and the complexity of urban life, which accelerates the difficulty of living.

The heart formed during precious childhood has a significant impact even in adulthood. Wishing for the healthy growth of precious children who will carry the future, we will help with initiatives that nurture children’s mental and physical health improvement, enhance their intellectual and social adaptive abilities, and enrich their emotional development.

Please do not hesitate to contact us.

[Examples of Initiatives]

- Support for children in child welfare facilities (e.g., foreign instructors visit to provide English learning opportunities for children, holding events)
- Holding English and Japanese classes for foreign children

- Establishing environments for independent study (e.g., opening part of our organization's classrooms)
- Children's work experience (e.g., requesting cooperation from businesses connected to our organization)

④ Support Projects for Single Parents

Single-parent families face various hardships in their daily lives as they bear the responsibility of both child-rearing and maintaining their livelihood alone.

We will work to improve such environments even slightly and support them by sharing challenges together so that both the parents and their children can connect to a bright future.

If you have any concerns, please feel free to consult with us.

[Examples of Initiatives]

- Employment support for parents (e.g., job approaches)
- Skill support (e.g., learning English and basic computer skills)
- Providing places for children (e.g., providing after-school study spaces)

⑤ Multicultural Coexistence Support Projects

We need to acknowledge and respect differences in nationality, ethnicity, and cultural differences, build equal relationships, and coexist as members of the local community.

As Japan's population decline and aging accelerate rapidly, there is expected to be a shortage of working personnel, meaning more foreigners than ever will come to Japan, and the need for multicultural coexistence will increase further.

Toward realizing a society where foreigners living in Japan can coexist safely and smoothly in Japanese society, we will always stay close to them, share challenges together, solve them together, and establish an environment for rich communication.

[Examples of Initiatives]

- Providing gathering places (e.g., establishing environments that serve as meeting places)
- Holding events (e.g., Halloween parties, Christmas parties)
- Support for problem-solving (e.g., advocacy to public institutions such as municipalities, provision of support supplies, employment support)
